and 27th September 1985 by the Institute of Quality Assurance.

Roy Shemilt is Quality Assurance Manager for J.C. Bamford Excavators Ltd and has 30 years' experience working in the scientific and quality field. He studied works management and metallurgy at the North Staffordshire Polytechnic, and joined JCB in 1963 as a metallurgist responsible for material testing and supervision of the heat treatment plant. Following reorganization of the Quality function in 1974, he has held various supervisory positions in the Department, with special responsibility for introducing and maintaining systems and procedures to meet the requirements of Defence Standard 05-21. *He was appointed Departmental Manager in 1981. J. C. Bamford Excavators Ltd were highly commended, B Q Awards, 1984.*

The Major Force in Spring Load Testers

There's a Salter electronic spring load tester that's precisely right for your application. Accurate enough for your laboratory, robust enough for your factory floor. For details of the full range, ring 021-553 2929, telex 337877 or write to Salter, Spring Rd, Smethwick, Warley, West Midlands B66 1PF.
